

# Respiratory Syncytial Virus (RSV)

## SCHOOL HEALTH SERVICES

### SYMPTOMS

- Runny nose
- Cough/congestion
- Excessive wheezing for students with asthma

### HOW IT IS SPREAD

- Large droplets through cough, sneeze, talking
- Contact with unclean objects
  - table surface
  - door handle
- Germs live on surfaces for hours and 30 minutes on unclean hands

### WASH YOUR HANDS

Frequent hand washing to remove potential dirt and viruses after contact should be part of your routine.

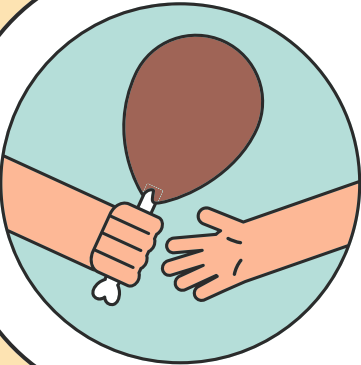

### SCHOOL OR NO SCHOOL?

#### School

- No fever
- Cough is controlled

#### No School

- Fever of 100 or more
- Uncontrolled cough
- Not feeling well to do all of school's daily activities

### DON'T SHARE

During this time, sharing food or drinks with your classmates must be avoided.

### STAY AT HOME

If you are not feeling well, do not force yourself to attend school. It is much better to monitor your health at home.
